**1. NATURE OF OPERATIONS**

American Potash Corp. (the “Company”) was incorporated on June 5, 2006 under the laws of British Columbia. The shares of the Company are traded on the Canadian Securities Exchange (“CSE”) under the symbol ‘AMP’. The Company is dedicated to the acquisition and development of potash mineral deposits in the United States and elsewhere.

The Company’s head office and registered and records office is 800 – 1199 West Hastings Street, Vancouver, BC, Canada V6E 3T5.

These condensed consolidated interim financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. As at January 31, 2017, the Company had not advanced its properties to commercial production and is not able to finance day to day activities through operations. The Company’s continuation as a going concern is dependent upon the successful results from its mineral properties exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company’s ability to continue as a going concern. Management intends to finance operating costs over the next twelve months with loans from directors and companies controlled by directors and or private placement of common shares. Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts on its consolidated statement of financial position.

**2. SIGNIFICANT ACCOUNTING POLICIES**

These financial statements were authorized for issue on April 3, 2017 by the directors of the Company.

**Statement of compliance**

The condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standards 34, *Interim Financial Reporting* (IAS 34”) using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (IFRIC”). The accounting policies and methods of computation applied by the Company in these condensed consolidated interim financial statements are the same as those applied in the Company’s annual financial statements as at and for the year ended July 31, 2016.

**2. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**Statement of compliance (Continued)**

These condensed consolidated interim financial statements do not include all of the information and note disclosures required for full annual financial statements and should be read in conjunction with the Company's annual financial statements as at and for the year ended July 31, 2016.

**Basis of preparation**

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments classified as at fair value through profit or loss have been measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

**Basis of consolidation**

These condensed consolidated interim financial statements include the accounts of the Company and its controlled entity. Control is achieved when the Company has the power to govern the financial operating policies of an entity so as to obtain benefits from its activities. Subsidiaries are fully consolidated from the date on which control is transferred to the Company until the date on which control ceases. All inter-company transactions, balances, income and expenses are eliminated in full upon consolidation. Details of controlled entities are as follows:

	Country of Incorporation	Percentage owned as at January 31,		Principal Activity
		2017	2016	
American Potash LLC ("American Potash")	United States	100%	100%	Mineral exploration

**3. EXPLORATION AND EVALUATION ASSETS**

**Green River Potash Project**

In May, 2009, and amended on November 2, 2010, December 6, 2011, January 28, 2014 and November 4, 2015, American Potash entered into an option agreement (the "Sweetwater Option") to acquire applications to the United States Bureau of Land Management ("BLM") in respect of certain Utah permits, together with all permits and other rights issued pursuant to the applications, to allow for the exploration of potash prospects in Utah. A director of the Company is a party to the Sweetwater Option.

**3. EXPLORATION AND EVALUATION ASSETS (Continued)**

**Green River Potash Project (Continued)**

The Sweetwater Option entitles American Potash to acquire a 100% interest in permit applications, subject to a 2% royalty to the Optionors which may be bought back for \$2,000,000 USD. The option may be exercised by having the Company pay a total of \$270,000 USD and issue in aggregate, 2,000,000 shares of Company to the Optionors upon receiving grants of exploration permits for not less than 25,000 acres of Utah property, as follows:

- \$70,000 USD upon signing the option agreement (paid);
- 40,000 shares of the Company upon grant of the permits representing not less than 25,000 acres (issued February 14, 2014);
- \$50,000 USD cash and 600,000 shares of the Company on or before the first anniversary date of the start of the Sweetwater Option Period (40,000 shares issued February 14, 2014);
- \$50,000 USD cash and 150,000 shares of the Company on or before the second anniversary date;
- \$50,000 USD cash and 150,000 shares of the Company on or before the third anniversary date; and
- \$50,000 USD cash on or before the fourth anniversary date.

On January 31, 2014, fourteen prospecting permits were formally signed and delivered to the Company, with an effective date of March 1, 2014; thereby initiating the Sweetwater Option period.

On February 23, 2015, the Company amended the terms of the Sweetwater Option agreement and announced delayed scheduled cash payments to the optionors. Pursuant to the amended Sweetwater option agreement, the Company is to issue the outstanding 3.6 million shares of the Company within a reasonable period of time from the first anniversary of the receipt of the federal potash prospecting permits which was on February 7, 2014 (3.6 million shares issued February 13, 2015). The scheduled cash payments are to be delivered no later than the following dates and in the following allocations: USD\$10,000 on the first anniversary of the receipt date; USD\$15,000 on the 18-month anniversary of the receipt date (paid August 21, 2015); USD\$25,000 on the earlier of the date that is 120 days immediately following the drill date and the two-year anniversary of the receipt date; and USD\$150,000 on the earlier of the date that is 120 days immediately following the drill date and the three-year anniversary of the receipt date. On February 23, 2015, the Company fulfilled the first anniversary obligations to the optionors, pursuant to the Sweetwater Option agreement, by issuing 3.6 million shares in the Company and paying US\$10,000. During the period ended January 31, 2017, the scheduled payments were amended.

During the year ended July 31, 2015, the fourteen prospecting permits delivered to the Company on January 31, 2014 expired as annual rent payments required to keep the permits in good standing were not paid. Sweetwater River Resources LLC has applied to the BLM for 12 new potash prospecting permits that encompass the same area as the original permits that expired. During the year ended July 31, 2015, no permits had been granted and as such the expired permits were impaired and fully written-off.

**3. EXPLORATION AND EVALUATION ASSETS (Continued)**

**Green River Potash Project (Continued)**

On November 5, 2015, the Company entered into an amending agreement to the option agreement, as amended with Sweetwater River Resources LLC. Pursuant to the amending agreement, the parties agreed that the 12 new potash prospecting permits that Sweetwater has applied for in Utah shall be subject to the option agreement. Accordingly, the company will continue to hold an option to acquire a 100-per-cent interest in the new prospecting permits applied for by Sweetwater pursuant to the terms of the option agreement. The parties agreed that the remaining \$175,000 of cash payments required under the Sweetwater Option shall be paid as follows:

- \$25,000 USD upon closing of a single financing or multiple financings totalling a minimum of \$200,000 by the Company (paid);
- \$25,000 USD on February 7, 2016 (paid);
- \$25,000 USD on June 7, 2016 (paid);
- \$25,000 USD on October 7, 2016 (paid); and
- \$75,000 USD within 30 days of new prospecting permits being granted by the BLM.

On December 21, 2015, the Company has received verification by the BLM regional office in Moab, Utah, of receipt and official documentation and filing of the Company's 12 potash permit applications in the Paradox basin of southeast Utah, United States, that the Company has under option through an agreement with Sweetwater River Resources LLC. However, BLM notified the Company that it will not process any potash claim application until late 2016 as BLM is in the process of finalizing the environmental impact statement for the area where the claims are located. As a result, the payments of \$154,570 made to Sweetwater River Resources LLC for application related costs were capitalized as refundable deposits as at January 31, 2017.

In 2011, the Company acquired eleven non-contiguous Utah State Trust Land potash lease units. The eleven lease units are all within the boundaries of the BLM potash prospecting permit applications held by the Company.

**9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT**

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

(a) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. The carrying amount of financial assets represents the maximum credit exposure. The risk is assessed as low.

(b) Foreign Exchange Rate Risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The functional currency of American Potash is the US dollar. Foreign currency risk arises from the fluctuation in currency exchange between the Canadian dollar and US dollar. The Company has not entered into financial instruments to hedge against this risk.

The following is an analysis of Canadian Dollar equivalent of financial assets and liabilities that are denominated in US dollars:

	<b>January 31, 2017</b>	<b>July 31, 2016</b>
	\$	\$
Cash	67,572	1,687
Accounts payable	(5,316)	(28,673)
	<b>62,256</b>	<b>(26,986)</b>

Based on the above net exposures, as at January 31, 2017, a 10% change in the US dollar to Canadian Dollar exchange rate would impact the Company's net income by \$6,226.

**9. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (Continued)**

(c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities. All of the Company's financial liabilities have contractual maturities of less than three months. Liquidity risk is assessed as high.

(d) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

(e) Interest Rate Risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has interest bearing assets in relation to cash at banks carried at floating interest rates with reference to the market. The Company has not used any financial instrument to hedge potential fluctuations in interest rates. The exposure to interest rates for the Company is considered immaterial.

(f) Fair Values

Financial instruments recognized at fair value on the consolidated statement of financial position must be classified in one of the following three fair value hierarchy levels:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Cash is measured using level 1 inputs.

**10. CAPITAL MANAGEMENT**

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support its operations and business development. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

**10. CAPITAL MANAGEMENT (Continued)**

The Company has not generated any revenues since its inception; therefore, the Company is dependent on external financing to fund its future intended business plan. The capital structure of the Company currently consists of working capital and shareholders' equity. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements. The Company is not subject to externally imposed capital requirements.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the year.

**11. SEGMENTED INFORMATION**

The Company's activities are all in one industry segment of mineral property acquisition and exploration. The Company's exploration operations are centralized whereby management of the Company is responsible for business results and the everyday decision-making. The Company's operations therefore are segmented on a geographic basis. The Company's non-current assets are all located in the United States.
