The shares outstanding presented have been adjusted to reflect the effect of the 2.5 to 1 share consolidation that took place on December 23, 2024. Common shares, stock options, warrants, restricted share units and per share amounts have been adjusted for the share consolidation unless otherwise noted.

The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1. NATURE OF OPERATIONS AND GOING CONCERN

American Critical Minerals Corp. (formerly American Potash Corp.) (the "Company" or "American Critical Minerals") was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on June 5, 2006.

The Company's principal activities include the acquisition and development of potash, lithium and bromine mineral deposits in the United States. American Critical Minerals is a public company which is listed on the Canadian Securities Exchange ("CSE") under the symbol "KCLI", on the OTCQB under the symbol "APCOF" and on the Frankfurt Stock Exchange under the symbol "2P3".

The Company's head office and registered and records office is Suite 1100 – 1199 West Hastings Street, Vancouver, BC V6E 3T5.

These condensed interim consolidated financial statements have been prepared on the assumption that the Company will continue as a going concern, meaning it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the ordinary course of operations. As at April 30, 2025, the Company had not advanced its properties to commercial production and is not able to finance day to day activities through operational cash flow. The Company's continuation as a going concern is dependent upon the successful results from its mineral properties exploration activities and its ability to attain profitable operations and generate funds there from and/or raise equity capital or borrowings sufficient to meet current and future obligations. These conditions indicate a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. Management intends to finance operating costs over the next twelve months through private placements of its common shares.

Should the Company be unable to continue as a going concern, asset realization values may be substantially different from their carrying values. These consolidated financial statements do not give effect to adjustments that would be necessary to carrying values, and classification of assets and liabilities should the Company be unable to continue as a going concern. Such adjustments could be material.

Effective December 23, 2024, the Company completed a consolidation of the common shares on a basis of 2.5 pre-consolidation common shares for 1 post-consolidation common share (the "Consolidation"). As required by IAS 33, *Earnings per Share*, all references to share capital, common shares outstanding, stock options, warrants, restricted share units and per share amounts in these condensed interim consolidated financial statements and the accompanying notes for periods prior to the Consolidation have been restated to reflect the Consolidation.

2. BASIS OF PREPARATION

Statement of compliance and functional currency

These condensed interim consolidated financial statements have been presented in accordance with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB'), applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting.*

2. BASIS OF PREPARATION (continued)

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for certain financial instruments classified as at fair value through profit or loss have been measured at fair value. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. These condensed interim consolidated financial statements are presented in Canadian dollars which is the parent company’s functional currency. The functional currency of the Company’s subsidiaries is the US dollar.

The preparation of financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

These condensed interim consolidated financial statements were approved by the Board of Directors on June 27, 2025.

3. MATERIAL ACCOUNTING POLICY INFORMATION

These condensed interim consolidated financial statements have been prepared on a basis consistent with the material accounting policies disclosed in the annual consolidated financial statements for the year ended July 31, 2024. Accordingly, they should be read in conjunction with the annual consolidated financial statements for the year ended July 31, 2024.

7. SHARE CAPITAL (continued)

g) Share purchase warrants

The continuity of warrants for the nine months ended April 30, 2025 and the year ended July 31, 2024 is as follows:

	Number of Warrants Outstanding	Weighted Average Exercise Price ($)
Balance, July 31, 2023	20,530,666	0.21
Warrants issued	4,620,800	0.19
Warrants exercised	(320,000)	0.19

The Company may terminate this agreement, at any time, by serving notice, in which event, the agreement will terminate on the date which is 12 months following such notice. The agreement has a change of control clause whereby Mr. Besserer is entitled to the equivalent of 24 months notice at his full monthly management fee.

10. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

a) Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions.

The carrying amount of financial assets represents the maximum credit exposure. The risk is assessed as low.

10. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

b) Foreign Exchange Rate Risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company operates in Canada, US, and Mexico and a portion of the Company's expenses are incurred in Canadian dollars ("CAD"), US dollars ("USD"), and Mexican Pesos ("MXN"). A significant change in the currency exchange rates between the Canadian, US and Mexican currencies, could have an effect on the Company's results of operations, financial position or cash flows. The Company has not entered into financial instruments to hedge against this risk.

The following is an analysis of Canadian Dollar equivalent of financial assets and liabilities that are denominated in USD and MXN:

	April 30, 2025	July 31, 2024
	$	$
Cash	14,031	2,411
Receivables and prepaids	45,950	27,672
Accounts payable and accrued liabilities	(28,950)	(55,972)
	31,031	(25,889)

Based on the above net exposures, as at April 30, 2025, a 10% change against the Canadian Dollar would impact the Company's net income by $3,103 (July 31, 2024 - $2,589).

c) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities. All of the Company's financial liabilities have contractual maturities of less than three months.

d) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

e) Interest Rate Risk

Interest rate risk is the risk that the fair value or cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has interest bearing assets in relation to cash at banks carried at floating interest rates with reference to the market. The Company does not hold any financial liabilities with variable interest rates. The Company has not used any financial instrument to hedge potential fluctuations in interest rates. The exposure to interest rates for the Company is considered immaterial.

10. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (continued)

f) Fair Values

Financial instruments recognized at fair value on the condensed interim consolidated statement of financial position must be classified in one of the following three fair value hierarchy levels:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 – Inputs that are not based on observable market data.

Cash and deposits are measured using level 1 inputs.

11. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support its operations and business development. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company has not generated any significant revenues since its inception; therefore, the Company is dependent on external financing to fund its future intended business plan. The capital structure of the Company currently consists of working capital and shareholders' equity. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements. The Company is not subject to externally imposed capital requirements.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period.

12. SEGMENTED INFORMATION

The Company operates in a single reportable operating segment, being the acquisition, exploration and retention of mineral property assets. Geographic segment information of the Company's non-current assets as at April 30, 2025 and July 31, 2024 is as follows:

Non-current assets	April 30, 2025	July 31, 2024
	$	$
United States	1,462,169	1,068,790
	1,462,169	1,068,790

13. SUBSEQUENT EVENT

a) On May 6, 2025, the Company granted 250,000 incentive stock options to a consultant. The options vest over six months and each stock option is exercisable to acquire one common share at $0.115 for a period of 5 years from the date of grant.
